## A Bright Solution To A Dark Old Problem

#18212 Springfield Urgent Care Center entry canopy **Model CRP** with gutters and down spouts by CPI, backlighting by others

#16855 Lowes Corporate Campus, Clearspan **Model CRP** walkway cover

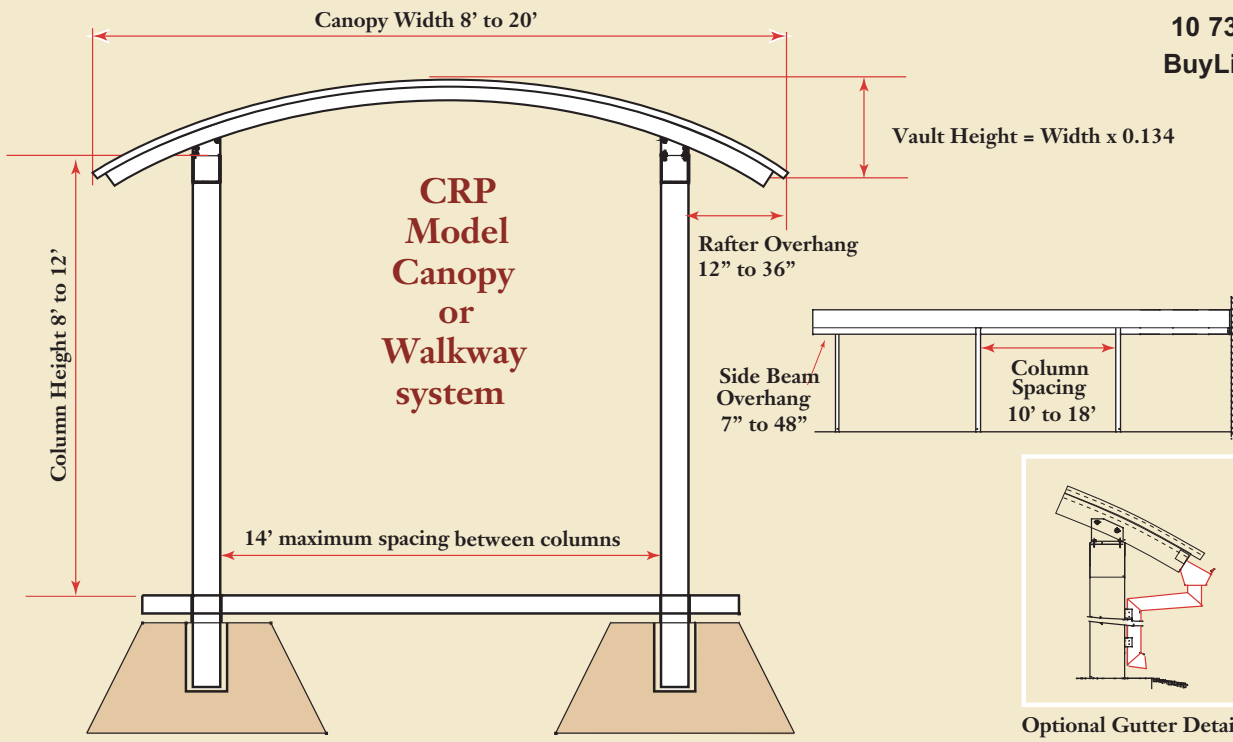

## Affordable Translucent Walkway and Canopy systems

CPI's Clearspan walkway and canopy covers are a bright solution to the problems inherent in metal walkway covers – dark and unpleasant industrial appearance, "closed-in" feeling and constant maintenance requirements. Clearspan walkway and canopy covers present attractive and affordable systems without the high costs and safety concerns associated with glass, acrylic and fiberglass systems.

## Unequaled Architectural Appeal

Clearspan walkway and canopy covers provide an excellent shelter and give an open air feeling by allowing the natural daylight to come through and light up the covered area. One major disadvantage of a metal canopy is that it is opaque and blocks light. This limits the width and potential applications of the canopy. When a metal canopy is next to a building it darkens the adjacent windows. CPI supports your canopy or walkway design with a translucent system that lets in natural daylight.
